

5/15

Have you installed adjustable wheelchair ramps? If so, can you recommend a good vendor for this product?

The City did our Wheelchair ramps.

No, but I have been a case manager in a prior life and Mobility Matters or most Durable Medical Equipment Companies can assist with this item. The consumer's MD needs to order it, they come out to inspect and measure. Must be consumer driven.

yes. We used a local company

<http://www.pviramps.com>

We have purchased from threshold ramps to 6-10 foot access ramps. There is a discounted price list if you ask for it.

*We have installed regular ramps, not the adjustable/telescoping ramp yet.. We use-
www.discountramps.com They also have the adjustable ones.*

Depends what you mean by adjustable. We have some that are concrete and therefore unmoveable. We have others that are more mobile and we can transfer between apartments if necessary. In terms of height etc, not much maneuverability.
